EDUCATION

B.Sc. in Computer Systems Engineering

Universidad Autónoma de Aguascalientes
7th semester (in progress)
Aguascalientes, Mexico

LANGUAGES

Spanish — Native
English — B1
Conversational · technical reading

KEY ROLE

SCRUM Master

Agile leadership on Full Stack projects

SOFT SKILLS

- Leadership**
Facilitating agile teams and driving decisions
- Communication**
Explaining technical work in clear language
- Teamwork**
Real projects with clients and institutions
- Problem solving**
Analysis and design of scalable solutions
- Adaptability**
Fast learner of new stacks and tools
- Time management**
Sprints and deliveries alongside coursework
- User empathy**
Accessibility and quality of experience

PROFESSIONAL PROFILE

Seventh-semester Computer Systems Engineering student with solid Full Stack development experience gained through real projects for educational institutions and small businesses. Specialized in React, Node.js and modern software architectures. I combine technical skills with agile leadership to deliver functional, scalable and user-centered solutions.

FEATURED PROJECTS

◆ TARA — University Mental Health Platform

React + Vite · Node.js · Prisma ORM · SQL

- Built multiple front-end modules for mental wellbeing, including interactive mini-games with React + Vite.
- Designed the database schema for user credit management and purchases using Prisma ORM.
- Developed Node.js back-end services integrating the credits module and the checkout gateway.
- Delivered accessible tools that help university students identify and manage emotions before professional therapy.

◆ Michis UAA — Feline Colony Monitoring

React + Vite · Expo · React Native · Node.js

- Built CRUDs for the web admin panel and sighting registration in the mobile app (full Full Stack scope).
- Led the team as SCRUM Master: sprint management, agile ceremonies and delivery of value increments.
- Created a centralized system to register and track university feline colonies, including sterilization status and zones.

◆ Exzootic — E-commerce Platform

JavaScript · Node.js · Third-party APIs

- Full Stack development with vanilla JavaScript on the front-end and Node.js on the back-end.
- Integrated multiple external APIs for transactional emails and the complete purchase flow.
- Designed an intuitive user interface with special focus on the checkout process and browsing experience.

◆ Payroll & Severance Simulator — SME

Business logic · Desktop interface

- Implemented the complete calculation logic for payroll and severance pay under applicable regulations.
- Built a clean GUI for non-technical HR users, automating calculations previously done manually in Excel.

Other projects:

- Guess Who Multiplayer — real-time gameplay over WebSockets in Java, with a custom graphical interface.
- BlindSwap — anonymous gift-exchange platform with a dynamic, intuitive flow.

TECHNICAL SKILLS

Front-end	React · Angular · TypeScript · JavaScript · Vite · Tailwind CSS · HTML5/CSS3
Back-end	Node.js · Express · Prisma ORM · REST APIs · WebSockets
Databases	SQL — schema design and complex queries
Mobile	Expo · React Native (iOS / Android / Web)
Other languages	C · C++ · Java · C# (WinForms)
DevOps	Docker · Linux (Debian/Ubuntu) · Virtual Machines
Methodologies	SCRUM · Software architecture · Git / GitHub
UI/UX	Visual asset design · UI owner on most projects
